

CHILD ABUSE AND NEGLECT

Child maltreatment is a serious problem that has grave and costly consequences for the child, his or her family and the community at-large. A child who has experienced abuse and neglect is more likely to have social, emotional and physical health problems and perform poorly in school.

FOSTER CARE - SERVED

Foster care is meant to be a temporary intervention to assure the safety and well-being of a child. A child who spends long periods in foster care is more likely than other children to drop out of school, have mental health challenges, and experience unemployment and/or homeless as an adult. The following shows the past five years of data regarding children served in foster care during each year.

FOSTER CARE - RE-ENTRIES

Data on re-entries provides information on children who come back into foster care because of new or continuing challenges at home. Some children experience numerous foster care episodes or cycle in an out of the system. Others can experience large spans of time between foster care episodes, which is why the age of children who typically re-enter is older.

FOSTER CARE - STABILITY

Every time a child moves, the trauma caused by separation and lack of continuity grows. A child who faces multiple placements struggles to build and maintain healthy relationships and faces academic challenges due to school changes.

Indicator

Foster Care Placement Stability

Children who were in foster care for 12 to 23 months and had three or more placement settings.

2009			2010			2011			2012			2013			County % Change 2009 to 2013

FOSTER CARE - TIMELY REUNIFICATION

A child's separation from his or her parents or relatives is traumatic for all involved. Minimizing the time a child spends in foster care without compromising safety is key to healthy child development.

Indicator

Timely Reunification with Parents or Relatives

Children who entered foster care for the first time who were reunified with their parents or discharged to relatives within the next 12 months.

2009			2010			2011			2012			2013			County % Change 2009 to 2013

FOSTER CARE - FAILED REUNIFICATION

A child re-entering foster care following a return to his or her family signals a breakdown in the family and a potential failure on the part of the child welfare system to appropriately address family needs.

Indicator

Failed 1-Year Reunification (Re-entry)

Children who re-entered foster care in fewer than 12 months following reunification with parents or relatives. (Data may be overstated.)
